

TRANSMISSION AND SUBSTATION MAINTENANCE

EXPANSEELECTRICAL.COM

Keep Your Power Delivery Assets Operating Safely with Maintenance Services from Expanse

Expanse Power Services, a division of Expanse, delivers predictive and preventative maintenance services to ensure continual safe operation of power transmission and substation systems from 34.5kV through 345kV. Our solutions include equipment commissioning, testing, inspection, repair and replacement, facility maintenance inspections and emergency restoration.

Expanse Power Services' testing solutions verify the integrity and security of existing systems and equipment. Our goal is to proactively support our clients to avoid outages and unnecessary damage by finding, repairing, and correcting any deficiencies before they impact HV, MV and LV Transmission, Distribution and Substation equipment or operations.

If an electrical emergency does arise, our experienced field team is available 24 hours to respond and restore power to the electrical system in a safe manner as quickly as possible, minimizing operational impact.

POWER MAINTENANCE SOLUTIONS & FIELD SERVICES BENEFITS

24/7/365
AVAILABILITY

30+ YEARS
OF POWER SYSTEM
CONSTRUCTION,
TESTING AND
MAINTENANCE

COST-
EFFECTIVE
SOLUTIONS
TO ENSURE
CONTINUAL SAFE
OPERATIONS

The Expanse Advantage

- Turnkey Services
- In-House Engineering
- Commission, Test & Maintain What We Install

Capabilities & Solutions

TRANSMISSION & SUBSTATION MAINTENANCE SERVICES

- Environmental Mitigation and Compliance
- Reconductoring of Existing Transmission Lines
- Pole Changeouts
- Storm Hardening
- Foundation Rehab
- Breaker/Relay Repair and Replacement
- CT/PT replacement
- Wiring Replacement
- Switch Adjustments
- Substation Battery Maintenance
- Switchgear and Bus Duct Cleaning
- Complete Transformer & LTC Maintenance and Repair Services
- 24/7 Emergency and Storm Response

INSPECTION & TESTING FIELD SERVICES

- Annual, Quarterly, and Monthly Maintenance Program Inspections
- Substation Battery Inspections
- Infrared Surveys and Analysis
- Oil and Gas Analysis and Leak Detection
- Substation Apparatus Testing Including Transformers, VTs, PTs, CCVTs and Arresters
- Switchgear and Bus Duct Inspection and Testing
- Protective Relay Testing and Calibration Including Electro-Mechanical, Solid State and Microprocessor
- Meter Calibration
- Motor and Generator Testing
- EHV, HV, MV & LV Circuit Breaker Testing
- Grounding Systems Testing and Analysis
- HV, MV & LV Cable Testing and Fault Locating
- System and Equipment Fault Analysis Power System and Disturbance monitoring & analysis
- Acceptance Testing & Commissioning

Why Expanse?

- 24/7 Emergency Response
- 70+ Years of Experience
- Turnkey Services & Solutions
- In-House Engineering Department
- Experienced Craftsmen
- Local Expertise on National Scale
- Customer Support Across Geographical & Operational Spectrums
